DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-37 are drawn to a label comprising (A) a polymer face stock having an upper surface and a lower surface; and (B) an adhesive layer derived from at least one two-part, high solids curable adhesive overlying the lower surface of the polymer face stock, classified in class 428, subclass 343+.

II. Claims 38-41 are drawn to a labeling process comprising the steps of (A) providing a substrate; (B) coating two-part, high solids curable adhesive to one surface or a polymeric face stock; and (C) applying the adhesive coated surface of the polymeric face stock to the substrate, classified in class 156, subclass various.

1. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as product (i.e. label) and process of use (i.e. labeling process). The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)).

In the instant case the process of using the product (i.e. label) as claimed can be practice with another materially different product such as an appliqué. The appliqué can be a wood veneer. Wood veneer is materially different product than a label. One surface of the appliqué is coated with adhesive and adhesive coated surface of the

appliqué is then pasted onto a substrate such as an automobile trim panel (e.g. side door or dash board).

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

3. Applicant's election with traverse of Group I (claims 1-37) in the reply filed on May 16th 2005 is acknowledged. The applicant has added a new claim 42, which depends on the claim 25 and he/she has requested that the examiner examine the new claim 42 along with the elected claims 1-37. Examiner is accepting applicant's request and will examine the claim 42 along with claims 1-37.

4. Further restriction to one of the following inventions is required under U.S.C. 121:
